#### First men on the moon

1. When the Soviet Union launched Sputnik 1 into space on October 4, 1957, the United States was surprised to find themselves behind in the race to space. Four years later, newly elected President John F. Kennedy understood the need to restore America's confidence and intended not merely to match the Soviets, but to beat them. In 1961 he began a dramatic expansion of the U.S. space program and committed NASA to the ambitious goal of landing a man on the moon and returning him safely to Earth by the end of the decade. Just eight years later, NASA accomplished this goal by placing the first humans on the moon. Sadly, President Kennedy, assassinated in 1963, did not live to see his dream come true.
2. At 9:32 a.m. on July 16, 1969, the *Apollo 11* space rocket took off successfully from the Kennedy Space Center in Florida. Neil Armstrong, Buzz Aldrin and Michael Collins were the astronauts on board. On the ground there were over 3,000 journalists and thousands of people watching the momentous occasion. Four days later, the *Apollo 11* spacecraft slowly circled around the moon. A lunar module attached to the *Apollo 11* landed on the moon with two astronauts Armstrong and Aldrin on board.
3. The first words said on the moon were 'the module has landed'. Then Neil Armstrong stepped down from the lunar module onto the moon and became the first human to set foot in another world. Neil was soon joined by Buzz Aldrin, and together they explored the moon on foot. The astronauts stayed on the moon for less than three hours, gathering 22 kilograms of rocks for study back on earth. The third member of the mission, Michael Collins, piloted the command spacecraft alone in lunar orbit until Armstrong and Aldrin returned to it for the trip back to Earth.

შეკითხვებზე გადასვლა

4. The lunar module carried cameras that allowed *Apollo 11* to broadcast TV pictures of the astronauts stepping down onto the moon. These cameras transmitted images from the moon to 600 million people around the world who watched the significant event in the history of mankind. It was a phenomenal moment.
5. While on the moon, the astronauts received an important call from President Richard Nixon. Nixon began by saying, 'Hello, Neil and Buzz. I am talking to you by telephone from the Oval Office of the White House. And this certainly has to be the most historic telephone call ever made. I just can't tell you how proud we are of what you have done.' The astronauts raised the U.S. flag on the moon and left a plaque there with President Nixon's signature and an inscription reading, 'Here men from the planet Earth first set foot upon the moon in July 1969, A.D. We came in peace for all mankind.'
6. The two astronauts returned to orbit, joining Collins. The spacecraft, with all three astronauts back on board, began its three-day journey back to Earth. On July 24, 1969, all the three astronauts came back to Earth safely. When the astronauts returned to earth they were welcomed as celebrities, and international heroes! These men had accomplished what men had only dared to dream for thousands of years – to walk on the moon!

1. The American astronauts landed on the moon on July 16, 1969.
2. The historic moment of the first lunar landing was broadcast live on TV worldwide.
3. The three astronauts left the moon leaving no trace of their presence behind.
4. In the 1960s President Kennedy set NASA the goal to radically develop the space program.
5. It took the three astronauts a week to get back to Earth.
6. Thousands of people witnessed the take-off of the great mission.
7. President Kennedy died after NASA had realised his dream.
